PROFESSIONAL SUMMARY

Full-Stack Java Developer and 2026 B.E. Computer Science graduate (CGPA 7.89) with hands-on experience building scalable web applications using Java, Spring Boot, React.js, and PostgreSQL. Skilled in designing RESTful APIs, implementing microservices architecture. Strong foundation in OOP, Data Structures & Algorithms, and SDLC, backed by 300+ problems solved on LeetCode. Seeking a Software Engineer role at a product-based company.

TECHNICAL SKILLS

Languages: Java, SQL, C

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, RESTful APIs, Microservices Architecture

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL

Tools : Git, GitHub, Postman

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Development Life Cycle (SDLC)

PROJECTS

Leave Management System / *Self Project* March 2025

Java, Spring Boot, React.js, PostgreSQL, REST API

- Built a full-stack leave management system with React.js on the frontend and Spring Boot (MVC architecture) on the backend, enabling students to submit leave requests with real-time status tracking.
- Designed a relational database schema in PostgreSQL and implemented CRUD operations for leave request data, ensuring consistent and reliable data storage.
- Implemented role-based approval workflows that allowed wardens and teachers to securely review, approve, or reject requests, reducing manual processing time.

Employee Status Management System / *Self Project* November 2024

Java, Spring Boot, React.js (Vite), PostgreSQL

- Developed a full-stack employee status tracking system using React.js (Vite) and Spring Boot, enabling employees to log and update daily work status through an intuitive interface.
- Built a centralized admin dashboard for real-time report viewing, improving management visibility into team activity and reducing status-check turnaround time.
- Designed a normalized PostgreSQL database schema to support efficient CRUD operations and reliable data persistence.

Complaint Register Website / *Team Project* June 2025

Java, Spring Boot, React.js, PostgreSQL, Microservices Architecture, REST API

- Engineered a microservices-based complaint management platform in Java and Spring Boot with a React.js frontend, enabling citizens to report and track civic issues end-to-end from submission to resolution.
- Designed and implemented RESTful APIs covering the full complaint lifecycle (create, assign, update, resolve) and applied Role-Based Access Control (RBAC) to secure citizen, official, and admin workflows.
- Optimized backend services and PostgreSQL queries to support multiple concurrent users with minimal latency, improving overall system scalability and response time.

EDUCATION

B.E., Computer Science and Engineering 2022 – 2026

Karpagam College of Engineering, Coimbatore (Anna University) | CGPA: 7.89

HSC — A.K.T Academic Matriculation Higher Secondary School 2022

State Board | Percentage: 82%

SSLC — A.K.T Memorial High School 2020

State Board | Percentage: 75%

CERTIFICATIONS

- React.js Certification — Coursera (October 2024)
- Master Spring Boot 3 & Spring Framework 6 with Java — Udemy (January 2025)
- Java Programming — NPTEL, Elite Medal (May 2024)

ACHIEVEMENTS

- Solved 300+ Data Structures and Algorithms problems on LeetCode, strengthening problem-solving and coding efficiency.
- Participated in a 24-hour Hackathon at Karpagam College of Engineering.
